

# Antima Jayprakash Mishra

## RESUME SUMMARY

I am a results-driven Frontend Developer with experience in creating responsive web interfaces using HTML, CSS, and React.js. Passionate about enhancing user experience, I aim to leverage my skills in MERN stack and web development to contribute meaningfully to innovative projects. Visit my portfolio at <https://portfolio-antima.onrender.com>.

Course BCA ( Computers )  
College KPB Hinduja College of Commerce, Mumbai, Mumbai  
Score 8%

### Schooling

	Class XII	Class X
Board Name	Maharashtra	Maharashtra
Medium	English	English
Year of Passing	2022	2019
Score	80%	85%

## INTERSHIPS

### GirlScript Summer of Code | July 2025 - July 2025

- As a Campus Ambassador for GSSoC, I served as the key link between the GirlScript Foundation and my college community, promoting open-source contributions and encouraging student participation. My responsibilities included:

Promoting the GSSoC program through online and offline channels, including social media, seminars, and peer groups.

Helping students understand the value of open-source development and guiding them on how to contribute.

### vaibhav technologies | November 2024 - May 2025

- I worked as a Frontend Developer Intern at Vaibhav Technology, where I developed responsive web interfaces using HTML, CSS, JavaScript, and React.js. I collaborated with the backend team to integrate APIs, fixed UI bugs, and participated in daily standups. I also improved existing website components to enhance user experience and page performance. This internship helped me strengthen my skills in frontend technologies and taught me how to work in an agile development environment.

### codSoft | October 2024 - November 2024

- As a Web Development Intern at CodSoft, I was responsible for designing and developing responsive and user-friendly websites using modern web technologies. My key responsibilities included:

Creating dynamic and responsive web pages using HTML5, CSS3, JavaScript, and Bootstrap.

Building interactive user interfaces and ensuring cross-browser compatibility.

Developing small projects such as landing pages, portfolios, and login systems.

Working on frontend logic and basic backend integration using tools like GitHub, Visual Studio Code, and Live Server.

Collaborating with the team to meet project deadlines and implement feedback for continuous improvement.

### GirlScript Summer Of Code | October 2024 - November 2024

- GirlScript Summer of Code 2024 - Extended Edition

As an Open Source Contributor, I:

## SKILLS

- Excel
- MS Office
- HTML
- CSS
- React.js
- Node.js
- MongoDB
- Postgresql
- Tailwind CSS
- Bootstrap
- Python
- Javascript
- Wordpress
- WIX
- Figma
- Canva
- Firebase
- Mern Stack
- Postman API
- Debugging
- Communication Skills
- Presentation Skills
- Ci/Cd
- Deployment

## LANGUAGES KNOWN

English ( Both )  
Hindi ( Both )

## CERTIFICATIONS

- Accenture Nordics - Software Engineer Job Simulation
- Front End Development Certification
- Fundamentals of digital marketing
- Postman API Fundamentals Student Expert
- Project-Based Learning
- Google Ads for Beginners
- Project Certificate
- Web Design for Everybody: Basics of Web Development & Coding Specialization
- Web Designing and PHP Development
- Cloud Computing

? Contributed code to real-world projects hosted on GitHub, improving features, fixing bugs, and enhancing documentation.

? Collaborated with maintainers and fellow contributors, discussing issues, reviewing pull requests, and understanding project roadmaps.

? Wrote clean, modular, and tested code using technologies like JavaScript, HTML/CSS, React, Node.js, etc., depending on the project requirements.

? Followed Git best practices, including forking, branching, making PRs, and resolving merge conflicts efficiently.

? Improved documentation and onboarding guides, making it easier for new contributors to get started with the projects.

? Engaged with the open source community, joining discussions on Discord/Slack, attending meetups, and learning from mentorship sessions.

? Learned project management tools like GitHub Projects, Issues, and Labels to track contributions and progress effectively

## PROJECTS

### Tradix | February 2025 - April 2025

-

Tradix is a web-based platform designed for traders who want to track, analyze, and improve their trading performance through structured journaling. The goal of this project is to help users develop a disciplined trading habit, understand their patterns, and make smarter trading decisions.

This project is built using the MERN stack!

---

## ACHIEVEMENTS

- All rounder, Department topper in BCA
- Top 10 in class in school
